

ResinPak

Producer Benefits Fact Sheet

- Lower Package Cost - 34%
- Lower Warehouse Cost
 - Filled - 15%
 - Empty - 80%
- Fewer Receipts - 80%
- Lower Shipping Cost - 7%
- No Wood Pallet Issues
- Not Susceptible to Moisture

Savings We Can Document

The ResinPak is lighter and takes up much less space than gaylord boxes and pallets. Instead of storing 20 truckloads of 500 boxes and 500 pallets, why not store 4 truckloads of 500 ResinPaks? What could you do with that extra space?

The filled ResinPak footprint is more efficient when compared to the Gaylord box and pallet. Increase the warehouse efficiency by 15%. This adds to the warehousing savings gained from empty packaging storage.

The most direct benefit of the ResinPak is in the reduction of packaging costs. By using the product to support the package instead of building rigid walls, the ResinPak's direct cost is less than that of boxes and pallets. There is no doubt that the box and pallet served their purpose but the ResinPak is a more modern package designed to fit today's circumstances.

ResinPak will dramatically reduce your costs. Call us today to schedule *your* trial!
